

- TERRACOTTA
- QUARRY TILE
- PORCELAIN
- TILES
- GLAZED CERAMIC TILE
- ACID-RESISTANT NATURAL STONE

Some kinds of acid can damage the surface, metal parts and joints. **DETERDEK** both cleans and respects the materials.

WHAT IT'S FOR

- Removes all grout residues and building-site dirt.
- Eliminates any saline efflorescence from terracotta and bricks.
- Removes lime deposits from floors, wall tiles (showers), and bathroom fixtures.
- All-in-one descaler and detergent: contains high concentrations of surfactants.
- Removes rust stains.

ADVANTAGES

- Does not emit fumes that are harmful to users or the environment: a welcome substitute to muriatic acid.
- Does not alter color or appearance of the surface.
- Cleans without damaging surfaces. Does not harm aluminium or steel trims.
- Multi-purpose: terracotta, porcelain, acid-resistant stone.
- According to dilution, can be used as either a detergent or a descaler.

HOW IT'S USED

Dilution: 1:5 – 1:10 depending on the amount of dirt to be removed.

Application:

- Wet the surface before applying the product*
1. Spread the diluted product on the floor with a scrubbing machine. Floor cleaning machine or rag and leave to act for a few minutes.
 2. Clean using a single disc professional cleaner fitted the most appropriate disc (e.g.: brown for terracotta) or with a floor cleaning brush.
 3. Vacuum or wipe up residue.
 4. Rinse with plenty of clean water.

Caution:

Do not use Deterdek on glossy or prepolished marble and in general on acid-sensitive materials (e.g. black slate). Before cleaning ceramic tiles, patch test a small area for resistance to the product. For items in aluminium, follow the instructions and use a soft sponge.

DILUTION AND COVERAGE

With one litre (1,06 QT):

Terracotta 1:5	10/20 m ² (108-215 sq ft)
Porcelain 1:5	40 m ² (430 sq ft)
Natural stone 1:5-1:10	20/35 m ² (215/377 sq ft)

"Coverage rates are approximate and refer to a single coat of the product"

Packaging

1 liter (1.06 qt) flasks in box of 12.
5 liter (1.32 US gal) flasks in box of 4.

PRECAUTIONS

- Keep out of the reach of children.
- Dispose of the container properly after use.

TEMPERATURE

Storage temperature:
between 41° F (5° C) and 86° F (30° C).
Must be applied to material at temperatures between 41° F (5° C) and 86° F (30° C).

LABELLING

CORROSIVE

Warning: DANGER!

Hazard statements: CASUSES

BURNS TO SKIN AND EYES

Precautionary statements:

Product mists can burn respiratory tract and will cause burns if swallowed. Keep Out of the Reach of Children. Contains phosphoric acid.

First aid:

In case of eye contact, flush eyes with running water for 15 minutes. Get immediate medical assistance. On skin – Flush with running water. Remove contaminated clothing. If irritation persists or burns are present get medical assistance. If swallowed obtain immediate medical attention. Do not induce

vomiting. If inhaled, remove to fresh air. If breathing is irregular or irritation persists seek medical attention.

TECHNICAL INFORMATION

Appearance: liquid

Odour: Pungent with floral fragrance

Density: 1.129 kg/litre

pH (10% solution): 1.5
