**PRODUCT BENEFITS**
- Heavy duty protection against most stains
- Preserves natural look
- Solvent-based formula
- Interior and exterior use

**RECOMMENDED SURFACES**
Natural stone such as granite, limestone, slate, travertine, bluestone and sandstone.

**AVAILABLE SIZES**
Pint, Quart, Gallon*, 5 Gallon*

**COVERAGE**
Up to 1,000 sq ft per gallon, depending on porosity of stone.

**EXPECTED WEAR**
Up to 5 years on interior surfaces and up to 3 years on exterior surfaces.

**TECHNICAL INFORMATION**

- **Form:** Liquid
- **Specific Gravity:** 0.746
- **HMIS Rating:** 2.2, 0
- **Flash Point:** 108 °F (42.2 °C)
- **VOC CONTENT:** 734 g/L

*Sizes not available for sale in all areas

The DuPont™ StoneTech® Professional product line complies with all federal, state and local VOC regulatory requirements.

**DIRECTIONS**
Read entire label before using. Use only as directed. Always test in a small inconspicuous area with a 24-hour cure time to determine ease of application and desired results. Allow new grout installations to cure for a minimum of 72 hours prior to applying sealer. Make sure surface is clean, dry and free of waxes and coatings. Surface temperature should be between 50 °F and 80 °F (10 °C and 26.7 °C). Keep children and pets out of the area until treated surface is dry.

1. Ensure area is well-ventilated during application and until the surface is dry. Use a respirator if unsure that area is well-ventilated. A NIOSH-approved respirator with a combination HEPA/organic vapor cartridge is recommended. Follow respirator manufacturer’s instructions for use.
2. Mask off any surfaces not intended to be treated.
3. Liberally apply an even coat using a paint pad, roller, brush or pump-up garden sprayer. DO NOT USE A POWER SPRAYER. See Method of Application for more information. Do not thin before using.
4. Allow sealer to penetrate surface for 15-30 minutes; denser stone may require more time for sealer to penetrate. During this time, distribute excess sealer over entire area to ensure even penetration. DO NOT ALLOW EXCESS IMPREGNATOR PRO® TO DRY ON SURFACE.
5. Thoroughly wipe entire surface with dry cloth to remove all remaining DuPont™ StoneTech® Professional Impregnator Pro® Sealer from surface. A second coat may be needed for more porous surfaces and should be applied one hour after initial application, as directed in steps 3-5.
6. If excess sealer was not completely wiped off and a residue appears, wipe entire surface with a towel dampened with sealer. Use a white nylon scrubbing pad to loosen residue and follow with white absorbent towel to remove.
7. Full cure is achieved after 24-72 hours; foot traffic may begin in 6-8 hours. Cover with red rosin paper if foot traffic must resume before the recommended time periods have passed.
8. Rags and equipment that are wet with product may be flammable. Clean up promptly after job is complete. Clean equipment with mineral spirits and allow to dry in a well-ventilated area. Allow rags to dry in a well-ventilated area out of the reach of children and pets. When dry, dispose of in accordance with local waste disposal regulations.

**METHOD OF APPLICATION:**
DO NOT USE A POWER SPRAYER. Power sprayers increase exposure hazard. Power sprayers also create a significant amount of overspray resulting in wasted product and the need for additional clean-up. A pump-up garden sprayer will reduce the potential for overspray and produce better results.

For small jobs, use a paint pad, roller or brush. Trigger spray bottles are not recommended. Trigger sprayers create overspray and may not give a uniform application. Better results will be obtained using a paint pad, roller or brush.

For larger jobs, use a pump-up garden sprayer available at your local garden center, hardware store, or home improvement center.

**STORAGE AND HANDLING INSTRUCTIONS**

**WARNING:** COMBUSTIBLE. HARMFUL OR FATAL IF SWALLOWED. Do not ingest. HARMFUL VAPORS. Avoid prolonged exposure to vapors. Use only in a well-ventilated area. For spray application, use a pump-up garden sprayer. DO NOT USE A POWER SPRAYER. Use a respirator if unsure that work area is well-ventilated. A NIOSH-approved respirator with a combination HEPA/organic vapor cartridge is recommended. Follow respirator manufacturer’s instructions for use. MAY CAUSE EYE, SKIN AND RESPIRATORY IRRITATION. Avoid contact with eyes and skin. Wear solvent-resistant gloves such as nitrile gloves. KEEP OUT OF THE REACH OF CHILDREN. Do not store above 100 °F/38 °C. Do not mix with other chemicals. Do not release to natural waterways.

**EMERGENCY/FIRST AID PROCEDURES**

- **Ingestion:** Do not induce vomiting. Call poison control center. Call a physician.
- **Eye Contact:** Flush thoroughly with water for at least 15 minutes. Call a physician if eye irritation persists.
- **Skin Contact:** Wash skin with mild soap and water. Call a physician if skin irritation persists. Launder affected clothing before re-wearing.
- **Inhalation:** Remove affected person to fresh air. Call a physician if irritation, nausea, dizziness or respiratory problems persist.
